

Building the Best Clearing and Execution Services Firm in the World

## Penson's Institutional FX Platform

Penson's institutional FX platform is an electronic trading platform for deliverable foreign exchange. The platform provides easy to use trading functionality with dynamically updated, streaming, executable prices, as well as single or double click execution capability with customizable order types.

Built on the foundation of Penson's proprietary pricing engine, the institutional FX platform provides access to deep liquidity, low latency executions and access to a broad array of currency pairs.

### Penson's Institutional FX Platform Benefits

- Quick and easy access to deep liquidity in the world's most widely traded currency pairs
